

Mediarium

Brand kit v1 — logo, colour, type and UI tokens for the self-hosted media manager.

The Glass M

A dome — the glass bell of a vitrine, the vault of a planetarium — with an M cut up from its base. The glint on the upper left is what makes it read as glass: keep it wherever the mark is 48 px or larger and in full colour.

Rules

Clear space — at least $\frac{1}{4}$ of the mark's height on every side.

Minimum size — 16 px (favicon cut, no glint). Sidebar: 28 px.

Glint — full colour only, ≥ 48 px. Drop it in one-colour and small sizes.

On light — use Deep teal #0B7A6F; Vitrine teal is too pale for a white page.

Don't — rotate, outline, add gradients or shadows, recolour outside the palette, or put the -arr style badge ring around it.

03 · COLOUR — LIGHT THEME

Teal is the one brand accent — use it for the single primary action per screen, active navigation, links and headline numbers. Violet is the secondary accent for tags, quality badges and collections. Status colours are reserved for state (imported, downloading, wanted, failed) and never used decoratively.

DISPLAY

Sora

Wordmark, page titles, big stat numbers. SemiBold 600, tracking -1 to -2 %.

Movies · 128 Wanted

BODY / UI

IBM Plex Sans

Navigation, labels, forms, body copy. Regular 400, Medium 500 for nav, SemiBold 600 for buttons.

Search movies, indexers and downloads
